DETAILED ACTION

Information Disclosure Statement

Applicant's information disclosure received September 25, 2003 has been entered and considered.

Specification

The disclosure is objected to because of the following informalities:

On page 3, numeral "31" has been used to identify compartments (line 9) and a first section (line 31).

On page 3, numeral "83" has been used to identify an extension (line 26) and slots (page 7, line 13).

On page 3, numeral "110" has been used to identify a top piece (line 27) and a rear axel (page 9, line 25).

Appropriate correction is required.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "83" has been used to designate both an extension (Figure 1) and a slot (Figures 4 and 5). Reference character "110" has been used to designate both a top piece (Figure 8) and an axel (Figure 7). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should

Art Unit: 3635

include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a) because they fail to show "reduced section 28" as described in the specification (page 9, line 3). Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required

Art Unit: 3635

corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 16 is objected to because of the following informalities: In claim 16, line 22, "fourth" should probably be - - fifth - -.

Claim 19 is objected to because of the following informalities: In claim 19, line 14, "first position" should probably be - - second position - - and "second position" should probably be - - first position - -.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-15 are allowed.

If claims 16 and 19 are corrected of the objections explained above, then claims 16-23 would be allowable as well.
